Safety Page.....	4

Aviation's Carbon Neutral Goal

The global aviation industry has agreed to try to achieve net-zero carbon emissions by 2050. The goal will rely on a variety of CO2 emission reduction efforts. Hydraflow is well ahead of the curve and has already reduced our carbon emissions energy footprint by 75% since 2014!

Some of the ways we have been able to achieve this have been through:

- Installation of solar panels
- LED light conversion
- Installation of 24 car charging stations (remember to notify HR when you go electric)

The Spring Fling Step Challenge was a Success!

Congratulations to the top 4 performers who each won a \$100 Visa Gift Card

Christian Milroy, Yvonne Ayala, Miguel Menchaca, & Ramesh Patel

They all averaged over 18,000+ steps per day!

All participants were added into a raffle :

Nespresso: Matt Sears

Photo Printer: Michael Streavel

\$50 visa gift card: Paula Olmedo

\$50 visa gift card: Helen Mata

\$20 Canteen Bucks: Sam Lee

\$20 Canteen Bucks: Sam Sanchez

2 AMC tickets: Alan Merlos

2 AMC tickets: Maricruz Carmona

Want to win more points?

Employee that earns 20+ points on their dashboard from Friday 4/21 through Sunday 4/23 will be awarded 500 bonus bucks!

**THE FOLLOWING EMPLOYEES RECEIVED 100% ON THEIR EXAMS
(JAN 2023 – MAR 2023):**

Jorge Ayala (Cleaning & Testing)
Marty Camp (Calibration)
Claudia Hernandez (Clamshell)
Roland Lansangan (Quality Delegate Re-
evaluation)
Linda Luong (Solder Operator)
Rony Molina (Quality Delegate Re-
evaluation)
Kevin Monk (Electrical Conductivity)
Scott Oropeza (Dry Film)
Perla Orozco (Quality Delegate Re-
evaluation)
Rudy Pena (Quality Delegate Re-
evaluation)
Marco Rodriguez (Solder Inspector/
Operator)

Michael Streavel (Production Tester)
Jessica Takahashi (Clamshell)
David Watson (Quality Delegate Re-
evaluation)
Claudia Hernandez (Quality Delegate
Re-evaluation)
Matthew Marion (Swaging Flanges)
Aldo Martinez (Hose Assemblies)
Pragna Patel (Hose Assemblies)
Cecilio Rodriguez (Quality Delegate Re-
evaluation)
Karen Oliver (Quality Delegate)
Jose Orejel (Electrical Test)

Cindy Ayloush was recently honored at the 13th Annual Service to the Flag Awards put on by the Greater Los Angeles Chapter of Women in Defense. Cindy received the Industry Award!

Helpful Tip for the Avenue C Market!

- In order to redeem "Canteen Bucks" you must log into your account from the kiosk and upload the bucks as "cash" to your account! Then you will be able to spend your new balance!
- For Coca Cola products be sure to cover the QR code when scanning the bar code at the kiosk!

HAPPY BIRTHDAY!

MEET OUR NEW HIRES

Isaiah Sinsun - Q.D - Valves
Kristen Avila - Clamshells
Vincent Gonzales - Production Control
Rana Tabbaa - Customer Service
Danny Nguyen - Machine Shop
Alicia Chavez - Clamshells
Alyssa Garcia - Clamshells
Henry Irineo - Coupling
Marisol Gomez - Clamshells
Jonathan Otto - Q.D - Valves

Ralph Villanueva - Receiving Inspection
Jancarlo Pineda - Stockroom
Marshall Lewis - Final Inspection
Ruby Miranda - Customer Service
Hung Mai - Machine Shop
Dat Nguyen - Machine Shop
Alonso Murillo - Hose Manufacturing
Ramiro Lopez - Shipping
Ismael De Anda - Customer Service

SAFETY PAGE

Signs & Labels Safety Talk

By Insurance Company of the West

What's the most dangerous chemical?

The Unlabeled One—Unintentional poisonings occur every year across North America. There are thousands of victims. The cause – unlabeled containers that store toxic chemicals!!!

What's the Danger?

Labels work because it tells what the chemical is, what are the hazards and how you can protect yourself. All chemicals used at work, even “household” chemicals, should be considered potentially hazardous. Always understand the hazards of the chemical. Chemicals can enter the body through various paths:

- Lungs: inhaling dusts, fumes, vapors, or gases.
- Skin: chemicals coming in contact with skin.
- Digestive system: ingesting chemicals.

Effects of chemical exposure:

- Acute: immediate outcomes upon exposure.
- Chronic: outcome from repeated exposure over longer duration.

Don't assume you aren't being exposed just because you don't experience immediate health outcomes: it may take days, months, years, to see chronic effects.

How to Protect Yourself

There are ways to deal with unintentional poisonings in your workplace. It has to do with how you treat and respect the full force and power of hazardous and toxic chemicals.

- Never use a chemical without reading the product's safety data sheet (SDS) and its label, including instructions for use.
- If a bottle is unlabeled, leave it unopened. Do not rely on your own senses for determining what chemical you have. Even lifting the lid to sniff certain chemicals is a bad move that could lead to serious respiratory damage.
- If you find a mystery product in an unlabeled container, tell your supervisor.
- Don't leave any unlabeled chemical substance around, even if you know what's in it. Instead, label, return or dispose of it properly.
- Never place any chemical in anything but its original, labeled container. Taping a piece of paper onto a bottle identifying the product is not enough because the ink can fade, or your makeshift label can fall off.
- Never place food or beverages in a refrigerator used to store hazardous chemicals. There are many hazardous chemicals in the workplace. But the most dangerous of them all is the one in an unlabeled container

Final Word

There are many hazardous chemicals in the workplace. But the most dangerous of them all is the one in an unlabeled container.
