

HYDRAFLOW

Engineered Aerospace and Defense Components

Hydraflow is committed to helping our customers meet their requirements with innovative products, high quality, on-time delivery and competitive prices. Hydraflow's low pressure fluid transfer components are designed to reduce installation time, waste, maintenance costs, weight, and overall lifecycle costs. Hydraflow's standard products can be customized to fit specialized low pressure applications. Hydraflow prides itself on creating ingenious solutions to a host of performance challenges.

Hydraflow is AS9100D and ISO9001:2015 certified.

Manifold Fittings

PRESSURE (PSIG)
OPER/PROOF/BURST **125/250/500**

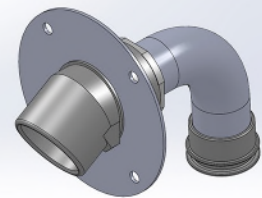

COUPLING SIZE **UP TO -32**

MATERIALS **CRES/ALUM**

OPERATING
TEMPERATURES **-65°F TO 275°F**

Hydraflow designs and manufactures manifold fittings for low pressure systems. Hydraflow has the ability to fabricate these types of fittings from single pieces and multiple pieces with brazing and/or welding.

Hydraflow's manifold fittings can be designed with many different end fitting interfaces, including quick disconnect mating ends, fixed cavity, flared, and flareless connections.
